WHY US?

Malcolm Hughes is one of the UK's largest and fastest-growing geospatial survey companies.

We deliver precision-driven surveying solutions, from detailed mapping to complex monitoring.

Our expertise ensures informed decision making and seamless project execution, to support safe and effective infrastructure.

Trusted by National Highways, Network Rail and Environment Agency amongst many others to deliver to the highest possible standards.

Industry professionals for over 40 years, validated by current industry accreditations.

Reliable geospatial consultants. With our years of experience and team of experts, we are perfectly placed to provide and advise on all forms of measured data.

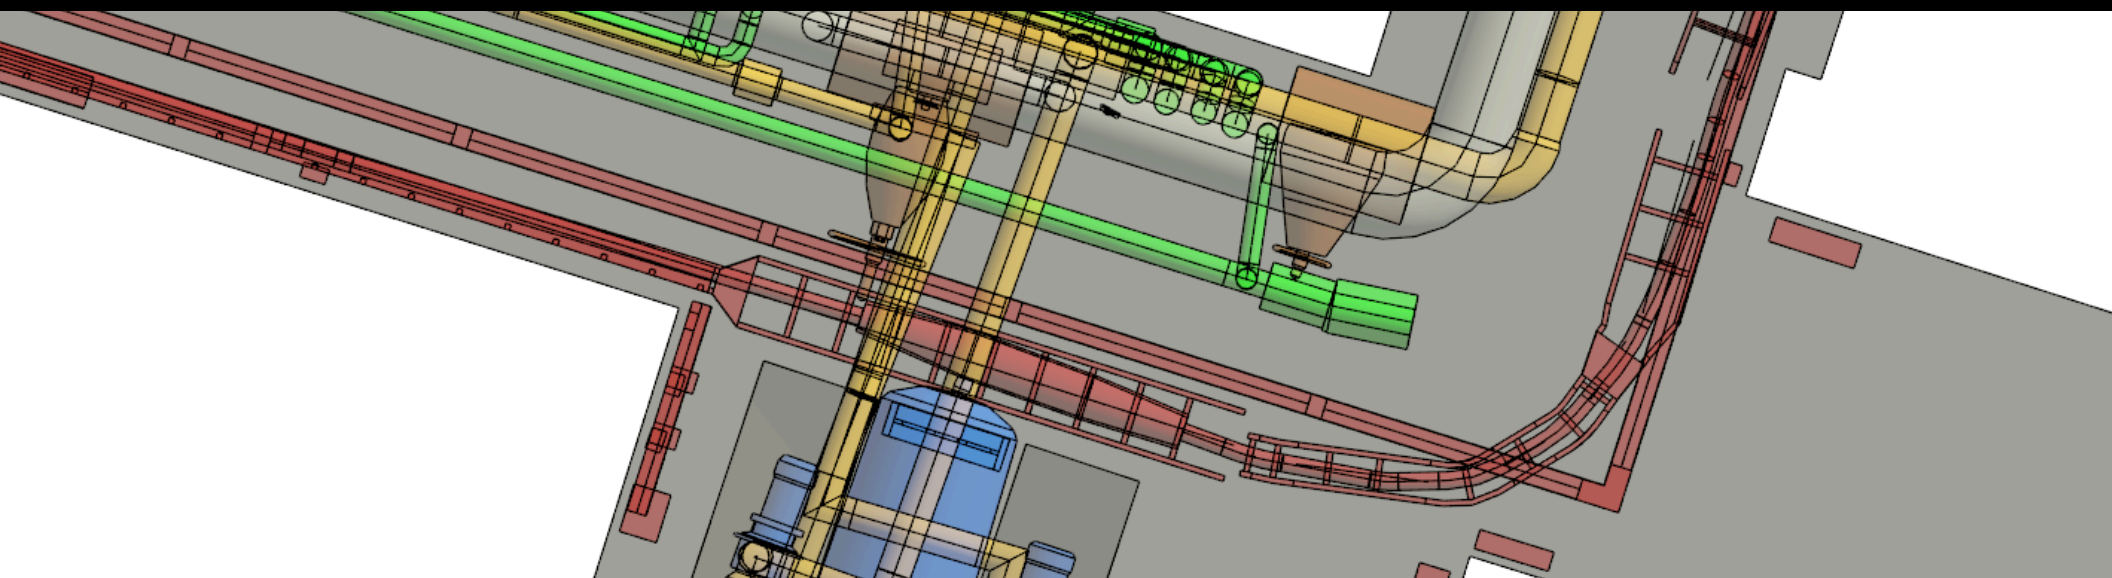

SURVEY SERVICES

**UTILITY MAPPING (PAS128)

MEASURED BUILDING
AREA MEASUREMENT
VERIFIED VIEW
UAV/DRONE
SETTING OUT
BOUNDARY
HYDROGRAPHIC**

SECTORS

**UTILITIES
ROADS & HIGHWAYS
RAILWAY
GOVERNMENT
AVIATION
ENGINEERING
INFRASTRUCTURE
ENERGY/RENEWABLES
RESIDENTIAL PROPERTY
COMMERCIAL PROPERTY
PORTS & HARBOURS**

UTILITY / UNDERGROUND SERVICES

- COMPLETE PAS128 SURVEY SERVICES INCLUDING DESKTOP UTILITY RECORD SEARCHES
- ADVANCED UTILITY SURVEYS
- VERIFICATION BY TRIAL HOLE EXCAVATION
- GROUND-PENETRATING RADAR SURVEYS
- UTILITY MAPPING SURVEYS OF ALL TYPES
- DRAINAGE MAPPING AND CCTV SERVICES
- EV CHARGING BESPOKE UTILITY SURVEYS

Move forward with precision. We deliver high accuracy underground utility mapping to help you plan, design and build with confidence. Our PAS 128-compliant surveys are carried out by experienced teams using advanced GPR and geospatial technology. As a PUMA accredited provider, we're verified to meet the highest industry standards, ensuring safe, efficient, and informed decision-making on every project.

PAS 128 Surveys & PUMA Accreditation

PAS 128 is the industry recognised specification for underground utility detection, verification and location in the UK. The benchmark for how utility surveys should be planned, executed and classified.

At Malcolm Hughes, we deliver fully PAS 128 compliant surveys, giving you confidence in the quality, traceability and accuracy of our data. Whether you need a high detail survey in a congested urban area or a targeted investigation on a greenfield site, our work is carried out to a defined methodology and clearly reported to PAS 128 standards. We're also proud to be PUMA-accredited. An independent, TSA led scheme that verifies our ability to deliver utility mapping surveys to PAS 128. This means our capabilities and processes are regularly audited, ensuring consistent delivery of the highest standards in utility detection.

“ IN OUR CLIENTS WORDS ”

“We engaged Malcolm Hughes to provide Sub-Surface Mapping surveys on a large area of Edinburgh City Centre. The team were quick to mobilise to site and highly adaptable to the environment. They fulfilled the specification to a high standard and in a timely manor, with survey results clearly indicating more sub surface hazards than we had anticipated – definitely a high value service that we’ll undoubtedly be utilising again with Malcolm Hughes” **Ritchie Clift - Associate Engineer CEng MICE IntPE (UK), AtkinsRealis**

“Despite speaking to many survey companies synonymous and specialising in this type of work, Malcolm Hughes presented unique solutions to overcome the challenges and upon contract award their staff were professional, reliable, highly competent and a valued team member throughout the duration of their contract. I would have no hesitation in using Malcolm Hughes in the future.”
